

In response to the Covid-19 Pandemic, for the safety of our patients and staff, we are taking measures to reduce the risk of coronavirus transmission in our community. We are seeing patients by Telehealth, and in-office visits are available for essential in-person care. When scheduling an appointment the following issues will be considered.

Is your dermatology problem urgent/essential?

Do you have risk factors for getting seriously ill if exposed to Covid-19?

- Do you have uncontrolled high blood pressure?
- Poorly controlled diabetes?
- Are you immunosuppressed?
 - Do you have a history of organ transplant?
 - Are you currently being treated for cancer?
- Do you smoke?
- Have you been diagnosed with COPD or any kind of lung disease?

*** If you have any of these risk factors, our doctors will make a recommendation about whether an In-office visit is advisable.**

If you have any of the following within 24 hours prior to your in-office appointment, we ask that you reschedule your appointment and call your primary care provider

- Cough, sore throat, or new onset shortness of breath
- Fever
- Recent diagnosis of Covid-19
- Recent contact with someone diagnosed with or exposed to Covid-19

For your in-office visit you will need to do the following:

- Bring and wear your own mask or some type of face covering ie...scarf, bandanna. In our office
- Come alone unless a parent or caregiver is needed
- Maintain 6 ft social distancing
- Have your forehead temperature taken at check-in

If you are a new patient to our practice, you will need to download fill out and e-mail back to us our New Patient forms through our website at least 48 hours before your appointment.
